CONTENTS

UCS@SCHOOL-UPDATE

This document contains the changelogs with the detailed change information for the update of UCS@school from version 5.0 v5 to 5.0 v6.

If necessary, important notes about the update are covered in a separate section. The change information for previous version jumps can be found at https://docs.software-univention.de/.

1.1 General notes on the update

During the update, services within the domain may fail. For this reason, the update should be performed within a maintenance window. It is generally recommended to install and test the update in a test environment first. The test environment should be identical to the production environment.

1.2 Update process

Major updates for UCS@school are released in the Univention App Center as a standalone app update. Minor updates and bug fixes (errata for UCS@school) that do not require interaction with the administrator are released in the repository of the already released app version of UCS@school. The changelog documents that Univention issues with each UCS@school app version are then expanded accordingly with a new section that shows which packages were released at what time and which errors were fixed in the process.

CHANGELOG

2.1 Released on 2024-09-26

Source package *ucs-school-umc-computerroom* in version `12.0.21`:

- Improved the performance of the UMC computer room module: More computers can be monitored at the same time (Bug #57610[1]).

- Improved the resource usage of the UMC computer room module: Unused computer room sessions will consume less resources (Bug #57099[2]).

Source package *ucs-school-veyon-client* in version `2.0.9`:

- Improved the performance of the Veyon Python client (Bug #57610[3]).

- The authentication error pop up which is sometimes shown on the monitored Windows clients will no longer appear (Bug #53995[4]).

2.2 Released on 2024-09-24

Source package *ucs-school-import-lusd* in version `1.0.0`:

- Added: A new package which supports importing users and groups from the LUSD API into UCS@school. See the LUSD Import section[5] in the UCS@school Import manual for more information (Bug #57547[6]).
