CHAPTER

ONE

UCS@SCHOOL-UPDATE

This document contains the changelogs with the detailed change information for the update of UCS@school from version 5.2v1 to 5.2v2.

The change information for previous version jumps can be found at the changelog overview page[1].

1.1 General notes on the update

During the update, services within the domain may fail. For this reason, the update should be performed within a maintenance window. It is generally recommended to install and test the update in a test environment first. The test environment should be identical to the production environment.

1.2 Update process

Major updates for UCS@school are released in the Univention App Center as a standalone app update. Minor updates and bug fixes (errata for UCS@school) that do not require interaction with the administrator are released in the repository of the already released app version of UCS@school. The changelog documents that Univention issues with each UCS@school app version are then expanded accordingly with a new section that shows which packages were released at what time and which errors were fixed in the process.

CHAPTER

TWO

CHANGELOG

2.1 Released on Jun 12, 2025

Source package *ucs-school-umc-exam* in version `12.0.5`:

- As of UCS 5.2-2 every LDAP object will have a unique `univentionObjectIdentifier` attribute. The UMC module for the exam mode has been adapted, to implement this for exam users as well (Bug #58382[2]).
